

# Shreyas Sunke

(425) 503-0100 | ssunke@uw.edu | linkedin.com/in/ssunke | github.com/shreyassunke | ssunke.vercel.app

## EDUCATION & HONORS

### University of Washington, Seattle

*Bachelor of Science in Informatics*

Sep 2026 – Jun 2028 (Expected)

*Seattle, WA*

### Indiana University, Bloomington

*Bachelor of Science in Business & Informatics (GPA: 3.8/4.00)*

Aug 2024 – May 2026

*Bloomington, IN*

**Honors:** Dean's List | DECA ICDC Nationals | Antler Spring '24 Cohort

## EXPERIENCE

### HUMN AI

*Project Lead*

May 2025 – Present

*Remote*

- Led cross-functional engineering team, defining full-stack architecture and CI/CD pipelines that improved deployment reliability and supported scale to 50+ product listings
- Architected Next.js, Node.js, MongoDB, and AWS S3 e-commerce stack achieving sub-2s page loads across 50+ product pages, reducing projected monthly infrastructure costs 30% through Clerk and AWS optimizations
- Built marketplace features with reusable React components and REST APIs, onboarding 20+ vendors and 50+ digital human avatar product listings
- Integrated Stripe payment APIs into Node.js backend with webhook-driven order fulfillment and PCI-compliant checkout, enabling subscription billing and secure product licensing across commercial transactions

### ProfessorAI

*Head of Business Operations, VP of Marketing, Project Manager*

November 2023 – June 2024

*Seattle, WA*

- Coordinated 6-member engineering and content team to ship 32 AP courses, accelerating delivery throughput with AI-assisted workflows and LaTeX/KaTeX formatting pipelines

## PROJECTS

### ATLAS | atlasgi.vercel.app

*Founder & Lead Developer*

Jan 2025 – Present

*Seattle, WA*

- Engineered RAG pipeline with vector database and LLM APIs on Supabase, Turf.js, and MapLibre, enabling semantic search, source-cited insights, and knowledge-graph entity mapping
- Built and deployed real-time OSINT platform on interactive 3D globe (GDELT, React, Cesium, globe.gl), integrating open-source intelligence feeds for live global event visualization

## LEADERSHIP & RESEARCH

### IU Data Science & AI Lab (DSAIL)

*Undergraduate Research Assistant*

Jan 2025 – May 2025

*Bloomington, IN*

- Engineered agentic skill-scraping pipeline on Quartz HPC cluster (SLURM), implementing normalized data schema to standardize AI competency records from heterogeneous web sources for downstream workforce analysis

### Kappa Theta Pi Professional Tech Fraternity

*National Director of Finance & Chapter VP of Finance*

Jan 2025 – May 2026

*Bloomington, IN*

- Established fraternity financial infrastructure by researching banking options, negotiating terms, and opening IU-based accounts with standardized budgeting and treasury reporting

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, SQL, HTML/CSS

**Frameworks & Libraries:** React, Next.js, Node.js, REST APIs, Cesium, globe.gl

**Tools & Platforms:** MongoDB, Vector DB, Supabase, AWS S3, Git, CI/CD, Stripe, Clerk

**Concepts:** Algorithms, Data Structures, System Design, Distributed Systems, OOP, RAG, LLM APIs, Semantic Search, Full-Stack Development
