EDUCATION & HONORS

University of Washington, Seattle

Bachelor of Science in Informatics

Sep 2026 – Jun 2028 (Expected)

Seattle, WA

Indiana University, Bloomington

Bachelor of Science in Business & Informatics (GPA: 3.8/4.00)

Aug 2024 – May 2026

Bloomington, IN

Honors: Dean's List | DECA ICDC Nationals | Antler Spring '24 Cohort

EXPERIENCE

HUMN AI

Project Lead

May 2025 – Present

Remote

- Led product and engineering execution for an early-stage AI marketplace, translating vendor onboarding needs into platform requirements, technical standards, and CI/CD workflows for a cross-functional team.
- Defined and shipped the core marketplace experience for digital human avatars, building reusable React components and REST APIs that supported 20+ vendors and 50+ product listings.
- Owned revenue enablement requirements by integrating Stripe subscriptions, licensing, PCI-compliant checkout, and webhook-driven order fulfillment into the Node.js backend.
- Analyzed platform performance and infrastructure tradeoffs across Next.js, MongoDB, AWS S3, and Clerk, sustaining sub-2s page loads while identifying optimizations that cut projected monthly costs by 30%.

ProfessorAI

Head of Business Operations, VP of Marketing, Project Manager

November 2023 – June 2024

Seattle, WA

- Coordinated a 6-member engineering and content team to deliver 32 AP courses, turning content requirements into AI-assisted production workflows and LaTeX/KaTeX formatting processes.
- Owned product operations and marketing execution for an AI education startup, aligning course roadmap, delivery priorities, and go-to-market messaging across technical and nontechnical stakeholders.

PROJECTS

ATLAS | atlasgi.vercel.app

Founder & Lead Developer

Jan 2025 – Present

Seattle, WA

- Founded and productized a real-time OSINT intelligence platform, defining the user experience for exploring global events through an interactive 3D globe and live open-source intelligence feeds.
- Evaluated AI and data capabilities for the product roadmap, building a RAG pipeline with vector database, LLM APIs, semantic search, source-cited insights, and knowledge-graph entity mapping.

LEADERSHIP & RESEARCH

IU Data Science & AI Lab (DSAIL)

Undergraduate Research Assistant

Jan 2025 – May 2025

Bloomington, IN

- Researched AI workforce trends by building a skill-scraping pipeline on IU's Quartz HPC cluster, structuring heterogeneous competency data for downstream analysis and product-style insights.

Kappa Theta Pi Professional Tech Fraternity

National Director of Finance & Chapter VP of Finance

Jan 2025 – May 2026

Bloomington, IN

- Established fraternity financial infrastructure by researching banking options, negotiating terms, and opening IU-based accounts with standardized budgeting and treasury reporting.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, REST APIs, Pandas

Tools & Platforms: Jira, Slack, Excel, Git, Stripe, MongoDB, AWS S3, Vector DB, Clerk, LaTeX/KaTeX

Concepts: Product Strategy, Product Requirements, User Stories, Roadmap Planning, User Research, Analytics, AI Products, SaaS, Enterprise Software, RAG, LLM APIs
